

EKSAYN

Room Set Up

FOR LARGE AUDIENCES

EksAyn is excited to speak for your event and wants to make it the very best possible. In order to do so, here are some things to note for the set up:

- EksAyn prefers a wireless microphone (lavalier or over the ear).
- EksAyn may use audio/visual if it will enhance the presentation and personalize the event.
- EksAyn is versatile and speaks in front of all kinds of audiences in different venues and can work with your audio visual team to make your event a once-in-a-life time experience.

FOR TRAININGS/SEMINARS/ BREAKOUT SESSIONS

EksAyn is excited to speak for your event and wants to make it the very best possible. In order to do so, here are some things to note for the set up:

- EksAyn prefers a wireless microphone (lavalier or over the ear).
- EksAyn often decides not to use a slide presentation, instead using a white board or large flip chart and markers. Please have either a whiteboard and markers or two flip charts each with markers that can be seen throughout the room. This allows EksAyn to “go” where the participants need to “go” in ways that a slideshow will not.
- Round tables and/or rectangular tables are preferred, though theater seating will also work.
